

(Student raises hand)

Master - Yes? question?

Student - Yes. Professor, how do we know that the world is a cube?

Master - What do you mean, "how do we know"? You went to grade school, you've seen what the world looks like.

Student - But we've seen theories that we could make maps in <sup>all</sup> kinds of shapes: spheres and toruses and mobius strips and all sorts of things, but we don't. We make cubes because our world is a cube. How do we know?

Master - There is a reason that those are theories instead of practices. They don't work. I was proved centuries ago that a map can only work, can only sustain life, can only have consistent physical rules, if it is cube shaped.

Student - How was that proved?

Master - Mathematically. There are books and books of proofs for it.

Student - Math has changed a lot since then. When was the last time someone checked them?

Master - The proofs are flawless. There is no need to check.

Student - What about the corners and the edges? We assume that they are there, but I never remember

hearing about what they look like.

Master - They are in the middle of the oceans. You've taken classes on this. You know why continents can't cross the edges. You know how the water works and gravity. I don't understand what your questions are.

Student - I've crossed the ocean on a ship, and I don't remember ever coming to an edge.

Master - That's because ~~the~~ our ships are really good, and ~~the~~ the edge is covered <sup>by</sup> ocean. Did you expect the ocean to come to a point  $\frac{1}{2}$  molecule thick?

Student - No, but -

Master - If you can't wrap your head around this than maybe you ought to consider a different occupation.

# Not to skate

Hobo in box

Drunk  
hobo

Friendly  
hobo

Fun  
street

Fat  
hobo

Puffy GRI

- o friendly
- o pretty & bland
- o dressed in party shirt
- o smiles
- o wandered but sat

# Sumo - wrestler

- Creepy
- wierd
- jumpy
- created world map of where won tournaments
- wands

Drunk 4

• Bipolar

• friendly-ish

• likes Drunk person

• steals rods

• tries to talk to everyone

# Hobo in box

- drunk

- responds to alcohol

but not much else

- wrapped up in clothes

- carries creepy white dolls

- stays in box

# Person in hat

- quiet

- shy

- wanders

- Do not try this at home.

- original not to scale, shrunk to show texture

- available for a one minute warranty

- with receipt • a driver licence • 2 kids
